Course Description

Release 8207

WebFOCUS Designer Series: Building a Basic InfoApp

Course #: 106S8207  Type: Self-Study
CEUs: N/A  Price: US $600  |  Canada $600

Summary

In this course, you will learn the basics of building a basic InfoApp with WebFOCUS Designer to support the key capabilities that enable you to maximize the power of your data as you create insights, analyses, reports and visualizations.

This course offers a comprehensive study of building a basic InfoApp with WebFOCUS Designer and an interactive learning experience—five modular learning units, over 15 lessons, two unit technical challenges, and an integrated AWS Cloud-enabled lab environment—collectively designed to build your proficiency as you move from unit to unit:

- WebFOCUS Home Page
- Creating Visual Content
- Creating Dynamic Filtered Content
- Adding Dynamic Content to a Page with Filter Controls
- Creating a Portal and Adding InfoApp Pages

This self-study course is one of ten courses in the WebFOCUS Designer eLearning series—a self-paced learning path from getting started to accreditation—which includes seven other self-study courses, including Practice Exercises and Challenges and Accreditation Prep + Exam. See details and register.
