Reporting Essentials using App Studio - Part 1 (Self Study)

Information Builders

Course 501
CEUs: N/A
Course 501
Release 8.2.03

This introductory course prepares developers for using App Studio, a Windows-based graphical user interface (GUI) development environment for creating WebFOCUS applications. This self-paced training gets you started with the fundamentals of report building concepts and techniques. This course gives you a firm foundation to build upon for more advanced courses in reporting and application development. Using a virtual environment that is available for 10 hours over 14 days, and in-session course materials, you will work through hands-on exercises and complete a challenge exercise to test your understanding. A PDF copy of the course manual is included for your reference.

You will learn how to:
- Navigate the App Studio interface and explore its options
- Create different types of basic reports commonly found in applications
- Create procedures with multiple components for customized reports
- Employ basic filter techniques to control report output
- Build virtual fields to customize your reporting content
- Employ style sheets and traffic lighting for effective data visualization
- Display report output in Excel, PDF, and Active HTML formats

Who Should Take This Course
Application Developers and Report Developers who will be using App Studio to create content for WebFOCUS applications.

Prerequisites:
Knowledge of Business Intelligence (BI) reporting concepts and operational data sources.

Tuition
In U.S. Dollars	In Canadian Dollars
