

iWay DataMigrator Essentials Self-Study

Course code: 975

CEUs: N/A

Release 7.7.08

The iWay DataMigrator Essentials Self-Study will introduce the student to the iWay DataMigrator concepts. In this course, the student will learn how to build data and process flows, that facilitate the extraction of information from single and multiple data sources, transform & enrich the extracted data, and load the data into new or existing relational targets.

This course is a prerequisite for the iWay DataMigrator Advanced Techniques course as it establishes the fundamentals of the Data Management console and the features of the Data Migrator product. Following your course guide and working in your personal hands on remote environment, available for 10 hours over 14 days, you will work through many hands-on exercises to build data and process flow applications using the DataMigrator Management Console. A PDF copy of the course manual is included for your reference.

You will learn how to:

- Use the Data Management Console
- Create Data and Process Flows
- Schedule a Process Flow
- Aggregate source data into new targets
- Complete a final challenge

Who Should Take This Course

The iWay Data Migrator Essentials Self-Study course should be taken by anyone required to build reporting objects, data marts or data warehouses.

Prerequisites:

None
