Managing Portals, Pages, and Content with WebFOCUS Designer (Self-study)

Course 397S8206
Release 8206
CEUs: n/a

This course will introduce you to the fundamental concepts and functions using WebFOCUS Designer, a web-based development tool that you can use to create interactive, responsive portals and pages, using content created by you or other members of your organization. This self-paced training gets you started using WebFOCUS Designer for building a series of user interfaces for existing reports and charts.

You will learn how to:

- Generate compelling portals and interactive pages quickly using your existing content
- Create a portal and its underlying structure
- Employ built-in templates to construct pages for displaying your content
- Resize and rearrange resources on a page with ease
- Use the integrated filter controls to create interactive, responsive pages from your content
- Customize your portal with icons at different portal levels
- Apply custom CSS and JavaScript to a page
- Put it all together in your portal

Using a virtual environment that is available for 10 hours over 14 days, and in-session course materials, you will work through hands-on exercises and complete a challenge exercise to test your understanding. A PDF copy of the course manual is included for your reference.

Who Should Take This Course
This course is for application developers who will create and manage portals and pages using WebFOCUS Designer.
